

FOR IMMEDIATE RELEASE:

Finn's Fishery Corp. Unveils Plans for State-of-the-Art Fishery and Educational Campus in Pinckney, Michigan, Launches \$8 Million Capital Campaign PINCKNEY, MICHIGAN – June 14th 2025 – Finn's Fishery Corp. today announced its ambitious plans to develop a cutting-edge state of the art and educational campus in the village of Pinckney, Michigan.

This innovative facility will be a central hub for sustainable aquaculture, providing fresh, high-quality sh directly to the public for consumption and through retail sales, while also serving as a vital center for education and research in the eld. The new state-of-the-art campus represents a significant investment in local economic development and a commitment to sustainable food production and knowledge sharing.

"We are incredibly excited to bring this multifaceted vision to life in Pinckney," said Joe Malik, President of Finn's Fishery Corp. Representative. "Our goal is to create a model that not only delivers exceptional products but also promotes responsible and environmentally sound practices in aquaculture, alongside learning invaluable educational opportunities to foster the next generation of industry leaders and enthusiasts."

To fund the acquisition of the building and execute the necessary capital improvements, Finn's Fishery Corp. is launching an \$8 million capital fund campaign.

This campaign will offer two distinct avenues for investors to participate in this groundbreaking venture:

1. Corporate Bond Offering: A corporate bond will be issued specifically for the real estate acquisition.
2. Stock Oering: A stock offering will be made available, providing investors with direct ownership in Finn's Fishery. Interested parties seeking complete perspectives on these financing opportunities are encouraged to contact The GONEN CORP.
